## EDUCATION

### University of Florida

**GPA: 3.87 / 4.00** B.S. in Computer Engineering, B.S. in Finance

**Involvement:** Association for Computing Machinery, Software Engineering Club, Competitive Programming Club, Solar Gators, Google Student Development Club

Gainesville, FL  
Expected Graduation: May 2025

## SKILLS

**Languages:** JavaScript / TypeScript, HTML5, CSS3, Python, Dart, Go, Java, C++, Ruby on Rails, SQL

**Tools:** Flutter, ReactJS, Angular, Git, Docker, Kubernetes, npm, pip

## EXPERIENCE

### Cisco Meraki – Software Engineering Intern - vMX & MR Dashboard Teams

May 2022 – August 2023

- Created a new **API endpoint** using **Ruby on Rails** to download binary device blobs and configure device characteristics of a Wireless Access Point by converting rows from a **PostgreSQL** database into a **Comma Separated Value (CSV)** format
- Developed a **Go Package** to format the output of the command-line tool to optionally output in an **ASCII Tabular format** or **serialized JSON**
- Designed & Built a **Hashicorp Terraform** Provider to access the **Meraki Dashboard** using the **Terraform Plugin Framework** to simplify the deployment of **vMX Devices**

### University of Florida Solar Gators – Telemetry Lead

March 2021 – February 2022

- Developed web application (**JavaScript**) to retrieve telemetry data from vehicle such as GPS location & velocity
- Displayed contents of retrieved data in real-time on dynamic map using **Google Map's JavaScript API**
- Cached collected telemetry data from each run in **MySQL** database using **Node.js** framework module
- Trained team members how to contribute to development using **Git** Version Control & **ClickUp** Task Control

### DigiConnect LLC. – Software Engineering Intern – Front End Infrastructure

May 2021 – August 2021

- Launched **native** third-party client application for several social networking sites using **Swift (iOS)** & **Java (Android)**
- Migrated native application code base into a shared language (**Dart**) using Google's **Flutter** Software Development Kit
- Overhauled Website UI using **ReactJS** for graphical adjustments with a data pipeline built on **Apache Spark** & **Firebase**

## PROJECTS @ ([www.github.com/skhatib07](https://www.github.com/skhatib07))

### VaccinApp - COVID-19 Vaccine Site Locator

**C++, Python, JavaScript**

- Finds nearest vaccine locations to the user using the user's current GPS coordinates & displays them on a map
- Retrieves vaccination site metadata from The **Socrata Open Data API** & current location from the **HTML Geolocation API**
- Collects historical data on previous vaccination queries in **JSON** format, sorting the data using a **PostgreSQL** table

### YOLO-ALPR - Automatic License Plate Detection & Recognition

**Python, C++, pip**

- Detects & isolates a vehicle & vehicle's license plate in a live video stream using Ultralytics **YOLOv5** architecture
- Analyzes detected vehicle to identify physical characteristics of the vehicle (color, make, model)
- Reads & saves license plate number using Google's **Tesseract** optical character recognition (OCR) engine
- Stores image of vehicle in an Amazon **AWS S3** container & identified information in an **SQLite** database

### Myoelectrics - Natural Robotic Hand & Actuation

**Python, Java, C++**

- Takes raw inputs from forearm muscles of user using 2 **MyoWare electromyography (EMG)** sensors
- Raw inputs are passed through & filtered using Weka3's **Sequential Minimal Optimization (SMO) regression**
- Degree of finger actuation is classified after filtration using a Multi-Output Convolutional Neural Network with **Keras API**
- 3-D printed model of hand is actuated using 6 separate SG90 Micro-Servo Motors powered by 5 Volt 3 Amp Power Bank

## AWARDS

### Intel Excellence in Computer Science Award

March 2019, February 2020

Awarded to top student project in the Computer Science Category at the Florida State Science and Engineering Fair

### Regeneron Science to Medicine Certificate of Recognition

March 2019

Presented to student with research improving modern medical technology at Florida State Science and Engineering Fair
